

**2017 Action Agenda
Justus-Warren Heart Disease and Stroke Prevention Task Force
January 9, 2017**

Legislative Endorse

- Endorse the \$3 million funding request to expand tobacco cessation and prevention services including funding for QuitlineNC.
- Endorse the \$7 million funding request for youth tobacco prevention.
- Endorse the \$1 million recurring funding request to expand the Healthy Food Small Retailer Program.

Monitor

- Track and monitor Care4Carolina's efforts to close the health insurance gap.

The 2017 Action Agenda outlines recommendations for action on issues of particular interest to the Task Force in a given year. Additional details on recommendations are provided in fact sheets.

The Task Force designates four categories for its priorities:

- **Support**

The highest level, "support," means that the JWTF takes leadership on the issue.

- **Endorse**

The JWTF may "endorse" an action advanced by another group that is important to preventing heart disease and stroke. This level is generally less active than "support."

- **Administrative**

"Administrative" concerns are those which may not require legislation but that the JWTF seeks to advance.

- **Track and Monitor**

The JWTF may "monitor" certain issues that are not currently ripe for intervention or involvement but may require action at a later time.
