NC Middle & High School Current* Users of Any Tobacco Product: NC YTS, 1999-2015

TIMELY REPORT FROM U.S. SURGEON GENERAL E-CIGARETTE USE AMONG YOUTH AND YOUNG ADULTS DEC. 2016

E-cigarettes are devices that typically deliver nicotine, flavorings, and other additives to users via an inhaled aerosol.

Nicotine exposure during adolescence can cause addiction and can harm the developing brain.

Nicotine can cross the placenta and is a risk factor for the fetus (for example, for SIDS and obesity).

E-cigarette aerosol is NOT harmless water vapor.

The screenshot shows a website page with a yellow header. On the left, there is a logo that says 'KNOW THE RISKS' with 'E-CIGARETTES & YOUNG PEOPLE' underneath, flanked by two white arrows pointing outwards. On the right side of the header, there are navigation links: 'get the facts', 'know the risks', 'take action', 'about', and 'resources'. Below the header is a large black and white photograph of a young man wearing a cap, looking off to the side. Overlaid on the left side of the photo is the text 'THE FACTS' in large yellow letters, followed by 'on e-cigarette use among youth and young adults' in smaller yellow text. Below this text are two buttons: a yellow button with a speech bubble icon and the text 'A Message from the U.S. Surgeon General', and a circular icon with a share symbol and the text 'Share this page'. A yellow checkmark icon is positioned below the share button. At the bottom of the page, there is a section titled 'E-cigarette Basics' in yellow, followed by a paragraph of text: 'E-cigarettes are devices that heat a liquid into an aerosol that the user inhales. The liquid usually has nicotine and flavoring in it, and other additives. The nicotine in e-cigarettes and regular cigarettes is addictive. E-cigarettes are considered'.

CDC REPORTS: AMONG YOUTH, E-CIGARETTE USE MAY LEAD TO CONVENTIONAL CIGARETTE USE

U.S. adolescents and young adults who had never smoked but used e-cigarettes at baseline were 8.3 times more likely to progress to cigarette smoking after 1 year than nonusers of e-cigarettes.

PREVENTION FUNDING PROPOSAL (AT MINIMUM)

Regional teen tobacco use prevention programs through local partners	\$6,400,000
Youth leadership training	\$200,000
1 FTE for tobacco-free campus coordinator	\$100,000
1 FTE for smoke-free multi-unit housing coordinator	\$100,000
Education and enforcement of state youth access tobacco law, including Electronic nicotine devices	\$100,000
Evaluation of tobacco use prevention program	\$100,000
