

Potential Legislative Levels of Support

The Justus-Warren Heart Disease and Stroke Prevention Task Force outlines issues of particular interest, and its recommendations become part of the annual report to the Governor and General Assembly. The JWTF could consider different levels of interest designated for issues.

- **Support**

The highest level, “support,” means that the JWTF takes leadership on the issue.

- **Endorse**

The JWTF may “endorse” an action advanced by another group that is important to preventing heart disease and stroke. This level is generally less active than “support.”

- **Administrative**

“Administrative” concerns are those which may not require legislation but that the JWTF seeks to advance.

- **Track and Monitor**

The JWTF may “monitor” certain issues that are not currently ripe for intervention or involvement but may require action at a later time.
